

# Trying to Choose Between Flexible, Cost-Effective Phone Systems and Proprietary, Reliable Telephony?

## Relax!

### Xorcom Gives You the Best of Both Worlds

Xorcom's unique system design ensures the reliability you would expect from a proprietary telephony system, while providing the flexibility, scalability, easy integration and competitive pricing afforded by an open source platform.

Xorcom's communication systems support all the bells and whistles of the wildly popular Asterisk PBX operating system while providing the following distinct benefits:

- Dual-PBX hot failover, including telephony interfaces
- Redundant power supply and disk
- High density of telephony interface combinations in a small footprint
- Flawless fax support
- Central browser-based management with full remote maintenance
- **No per user license fees!**

Xorcom offers a full range of hybrid (PSTN + VoIP) telephony solutions for SMB (small and medium-sized businesses) and enterprise. The different product families serve varying call volume modes and capacities.

Customers can choose their preferred pre-installed software distribution:

- **Xorcom's CompletePBX™** – a complete “one stop shop” communications solution
- **Elastix™** – a cost-effective, open source communications solution

### C/XR Series: IP-PBX

The C/XR series is designed for businesses with standard telephony requirements, where telephone traffic is typically at 40% usage. These reliable and cost-effective stand-alone appliances are available in three product families – XR1000, XR2000 and XR3000 (CXR1000, CXR2000 and CXR3000 for CompletePBX models) – to suit up to 30, 200 and 1000 users, respectively.

C/XR1000

C/XR2000, C/XR3000

C/XE2000, C/XE3000

CXT3000 "Blue Steel"

CXE4000

### C/XE and CXT Series: Enhanced IP-PBX

The C/XE and CXT series are designed for businesses whose call volumes are higher than 40%, and/or are running additional applications which mandate a more powerful phone system, and/or have stricter policies about networking and reliability. Available product families include the XE2000 and XE3000 (CXE2000, CXE3000, CXT3000 and CXE4000 for CompletePBX models), from 200 to 1500 users, respectively.

#### All models feature:

- Internet updates
- Operating voltage: 100/240 Volts 50/60 Hz
- Rapid Tunneling™ for remote technical support

### Add-ons Simplify Usability, Increase Reliability

Xorcom products are supplied with an ever-expanding array of options to simplify and extend their usability. For more information, see the Xorcom “Peripherals” brochure.
